

Dr. Rajeev Srivastava,
Aditya Birla Memorial Hospital,
Chinchwad, Pune.

—; Feedback regarding Sinonasal Adenocarcinoma:—

It all started nearly one year ago by a nasal polyp operation at an ENT Hospital. Polyp was suggested to be tested & it was resulted into adenocarcinoma. After couple of tests, PETCT etc everything came into picture & this real struggle started.

We opted to get treatment in Aditya Birla Hospital, as it was near from our residence & would have been easy for the patient. The actual treatment was started with 32 radiations & 6 Chemotherapy, under the guidance of Dr. Rajeev Srivastava, ~~and~~ as expected & by gods grace it was successful.

Dr. Rajeev Srivastava was the most kind doctor we have met. He is full of energy (positive energy which is required by any patient). He explained us everything related to the disease & made us ready ~~to~~ mentally for the treatment. We thank him whole heartedly.

Lastly we would thank Aditya Birla Memorial Hospital for world class facility for cancer treatment and all the comfort they provide to patient.

Thank you all the staff members who directly
or indirectly were involved in the process.

Yours Kindly, ~~and~~

Shivish G. Dharashirke
